

Another great product from

*the DMX tools company*

## *DMXLAN Node6X: believe it or not!*

Last born of our dmXLAN range of Nodes and Switches for the entertainment lighting industry, Node6X is the very first unit including as well a 5 port Switch and a 6 port DMX to ethernet Node in one single unit!

*Like all the ELC nodes, this unit is fully compatible and programmable thru our dmXLAN software (available for free download at [www.elclighting.com](http://www.elclighting.com)).*

### *Features:*

- Remote programming and monitoring
- DMX input options (Normal or Backup)
- DMX output options ( Normal, Merging in HTP / LTP or channel custom / Priority merging / Merging with channel by channel softpatch )
- Remote takeover of fixture parameters
- Visualizer input support like WYSIWYG / ESP / Capture, etc.

***And last but not least : our nodes & switches are absolutely quiet ( no fans!)***

### *Connections:*

3x 10/100 mBit Ethernet connection on Neutrik Ethercon

2x 10/100 mBit Ethernet connection on RJ45 on the rear pannel

6x BiDirectional DMX ports on Female XLR5-pin. ( Can be used as DMX output with

### *Specifications:*
