

another great product from

the DMX tools company

showSTORE XLan 2048 channels DMX recorder

Following the successful **showSTORE ST**, the new **showSTORE XLan** allows real time DMX recording, on a 1GB SD Memory Card, of 2048 channels (= 4 DMX universes) directly from the Artnet / ethernet network and / or from the 2 DMX XLR5 inputs ports. Total recording length can be up to 24 hours.

Playing back, the unit works stand alone like a DMX console and plays its 99 shows on the ethernet ports and / or on the 2 DMX XLR5 output ports.

...And last but not least, having an Ethernet port and 4 DMX ports (2 in / 2 out) , showSTORE XLAN can also be used as an independant Artnet Node, fully compatible with our new dmXLAN software with advanced DMX channel merging & patching!

Control showSTORE XLAN thru its control pannel or thru its Advanced External Triggers:

- Contact closers
- DMX input
- MIDI or RS232 input
- Realtime Clock, including day/month/year programming
- TCP/Telnet commands
- Built in webserver with custom-made webpages

Backup or file exchange can be done thru:

- USB (connected to the PC, the memory card is seen as an external harddrive or usb stick)
- FTP (update shows and settings & remote over the internet)

Extra connections:

- MIDI (DIN 5p)
- RS-232 (SUB-D)
- 4 Contact Closure inputs (SUB-D)
- SMPTE timecode 1/4" jack)
- 90-260V switching power supply with fixed mainslead

ELC is manufactured in Gemert, Netherland
