

## SE315 COMPONENTS

- A Rugged Ergonomic Housing**  
Ergonomic and stylish design features durable, sweat-resistant construction. Built to withstand the extremes of on-stage or everyday wear.
- B High-Definition MicroDriver + Tuned BassPort**  
Housed in a uniquely designed internal assembly, the High-Definition MicroDriver delivers full range audio with a Tuned BassPort for optimised low-end performance.
- C MicroDriver Assembly**  
Molded plastic design houses the MicroDriver providing protection against sudden impact. Unique built-in nozzle design with O-Ring spout configuration provides efficient audio delivery.
- D O-Ring**  
A flexible ring attached to the sound outlet spout creating a seal to prevent audio leaks for accurate acoustic performance.
- E MMCX Micro-Miniature Coaxial Connector**  
Gold-plated connector has a lock-snap mechanism allowing 360 degree rotation for comfortable fit.
- F Detachable with Wireform Fit Cable**  
Wireform fit ensures secure placement, detachability for easy replacement or customisation, and Kevlar® reinforced for durability. Worn over the ear.
- G Nozzle**  
Angled tube ensures efficient audio delivery and ergonomic fit. Directs sound to ear from internally housed built-in nozzle with O-Ring.
- H Sound Isolating Sleeves**  
Selection of foam and flex sleeves create a customised fit and comfortable seal that blocks background noise.
