

ATOM GRIP DUO

The Atom Grip Duo is a twin point, tilt & swivel flying adapter which can be mounted to all Rigtec Air Frames and other third-party rental frames. The Atom Grip Duo has been designed with heavier projectors in mind, like the Barco UDX series. With a twin point hanging system, the Atom Grip Duo can take full advantage of the adjustments without the truss twisting, which can be an issue when rigging extremely heavy projectors at an angle with a single point attachment.

Designed for hanging on box truss, the Atom Grip Duo features adjustable clamps. The clamps are adjustable and can be located in several positions for use with different sizes of truss. Popular truss sizes are labelled on the adjustment bar to allow for quick set up.

The Atom Grip Duo offers a simple solution for twin point projector hanging, with captive fixings it can be easily attached to a projector rental frame. Adjustments can be achieved via the ratchet handle, moving the handle to the right loosens the mechanism to allow 25° tilt and 360° rotation. Moving the handle back to the right locks the adjustments in position.

Specification

Part Number:	AGA01-D
Flying Weight:	6.7kg
SWL:	295kg
Material:	Aluminium
Adjustment:	25° tilt & 360° rotation
Tube Diameter:	Ø38-51mm
Bolt Size:	4 x M8 / 4 x M6
